advanced equipments

Doha, Qatar, Ibn Seena St.

info@premiumcleaningservices.net

In its disinfection procedure, Premium will be using LV sprayers, ULV sprayers and biospray disinfection machines that disperse as small as 30 Microns droplets.

WHAT WE DO

VIRUS TERMINATION

Our innovative solutions are a future-proof answer to the ever-prevalent threat of Viruses and Germs. Something that's absolutely critical in the healthcare industry. Our disinfectant sprayers break down water and oxygen in an environmentally friendly way to deal with the full spectrum of germs, bacteria, viruses and funguses inside public health areas. With uniform disinfection of each surface, including electronic ones, your interior and exterior areas will be left refreshingly clean, with fresh oxygen-rich air that's free of all germs and other infectious particles.

OUR DISINFECTION MACHINES

ULV FOGGER H05

The H05 is one of the best aerosol ULV foggers currently available, with its water and oil-powered engine. The ULV Fogger H05 allows to eliminate all Viruses, germs, crawling and flying pests with ease and a high degree of efficiency.

Where can it be used?

The H05 ULV cold fogger is used in greenhouses, hospitals, schools, homes, restaurants, holiday sites, food places, dairy farms, poultry yards, depots, barns, etc.

360° horizontal rotation
for homogeneous disinfection

Biospray DISINFECTION MACHINE

The BioX Spray hospital disinfection machine removes nearly 100% of all viruses, yeasts, mould and harmful bacteria from places where there's a high likelihood of germs, viruses and parasitic elements.

Where can it be used?

The BioX spray disinfectant fogging machine can be effectively used in: nurseries, aged care centres, hospitals and laboratories, ambulance, schools, poultry farms, cleaning industry, insect control, public transport, public health, veterinary clinics.

Longray pulse-jet Thermal Fogger

The Longray Pulse-jet Thermal Fogger (2nd-gen) brings the benefits of thermal fogging - increased spraying distance, finer particle size, wireless operation - within reach of more value-conscious users.

Where can it be used?

All outdoor areas and premises.
